

Akindi Set-Up

This guide will show how to launch Akindi in Canvas. You'll need to repeat this launch process for each course that you will use Akindi.

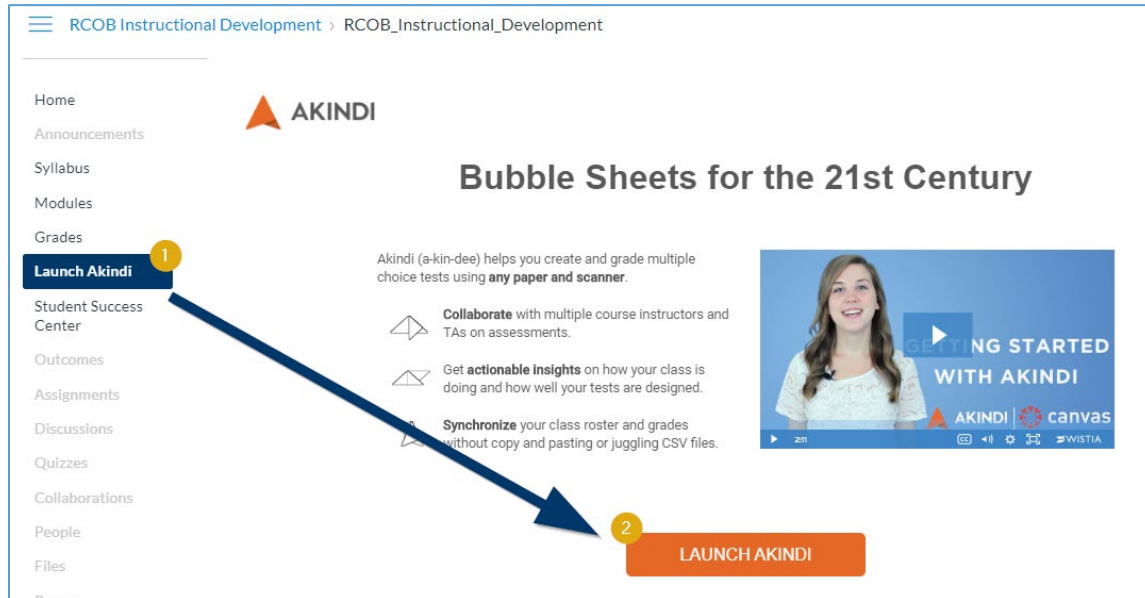

First, select one of your Canvas courses. Go to the course navigation menu and select Settings, then the Navigation tab.

Drag the Launch Akindi tool up to the top navigation menu to enable it. *Remember to scroll back down and select SAVE before exiting this page!*

To open Akindi in your course site, select Launch Akindi in the course navigation menu and then select the orange Launch Akindi button.

The next screen will be your Akindi dashboard. Here you will find information from previously graded assessments, the link to create a new assessment, and course roster information.
