**\*2. Please provide your university/institutional ID code/number (if available):**

**\*3. Please enter your last name:**

**\*4. Please enter the name of the city in which you were born:**

**\*5. I am:**

- Male
- Female

## 6. What does successful interprofessional collaborative practice mean to you?

## 7. What is the patient impact of an uncollaborative team?

## 8. How do you see interprofessional care being part of your future career?

# Intro to Interprofessional Eval

Please choose the best answer for each of the questions below:

## 9. It is estimated that by 2030, the size of the older adult population will:

- decrease from the size that it is today
- stay the same as today
- be more than twice the size of the older adult population in 2000

## 10. Interprofessional collaborative practice and education are especially important now because:

- there are currently major issues concerning health care quality.
- legislation, with critical impacts on health care, has been passed recently.
- there is widespread concern over the increasing cost of health care delivery.
- all of the above

## 11. The four interprofessional core competencies, as set forth by the Interprofessional Education Collaborative are:

- physical environment, team members, evaluation tools, and data sets
- values, morals, quality, and critical thinking skills
- teams/teamwork, values/ethics, interprofessional communication, and roles/responsibilities
- evidence-based practice, ethics, professionalism, and expertise

## 12. The goal of interprofessional learning is to:

- prepare health professionals for working deliberately together with a common goal of building a safer more patient centered healthcare system
- encourage healthcare professionals to work only within their profession
- enable healthcare professionals to formulate a full plan of care and send a patient note to another healthcare professional after the patient has been discharged
- equip healthcare professionals with a certain set of skills and expertise as well as knowledge on how to refer a patient to other healthcare professionals to seek advice

## 13. What does it take to be a highly effective and efficient collaborative team?

- education, practice and time
- patience and practice
- evolution and progress
- nothing, it will just transpire naturally

## Intro to Interprofessional Eval

### **14. In healthcare, interprofessionalism is best exemplified in which of the following scenarios?**

- Healthcare professionals within a single discipline meet to discuss a plan of care that incorporates the best practices of its discipline.
- Healthcare professionals refer a patient or client to a specialty provider.
- Healthcare consumers bring in information that was gathered on the internet to their visit or scheduled appointment.
- A Family Nurse Practitioner is seeing a patient that has been placed on a new medicine with dietary restrictions. The practitioner, along with the patient, conference calls a Nutritionist and Pharmacist to discuss the safe use of the medicine.

### **15. If Tom had been cared for by a team who had the benefit of inter professional education then,**

- Tom and his family would have expressed greater satisfaction and identified a more positive experience.
- Tom would have had better health outcomes.
- Tom would have had better knowledge of his health condition and better skills for self-care.
- all of the above are true
