MY JOURNEY IN DESIGN

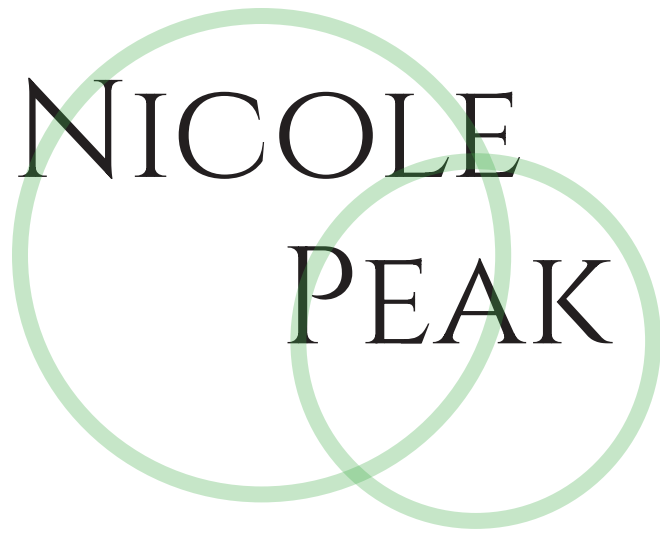

When I was in kindergarten, I went to an elementary school that was in a large historic building tucked away in the woods. It was unlike any building around, and the only one in my town that was designed by an architect. Sadly, my time there was cut far too short. During renovations, asbestos made its way into the air, and we were all sent to go to school elsewhere.

That was my first heart break. I knew then how important surroundings were to the human experience. I wanted to go to school more when I had a great building to learn in all day.

As I begin my career, I want to focus on designing spaces that have this effect on people. The spaces I design keep function and comfortability the main priority. Schools should enhance learning, offices: working, and homes: nurturing. I also want to focus on creating spaces that are healthy for the individual, and stand the test of time. Interiors should reflect the people that reside there, and be flexible enough to grow along with them. In my career, I hope to design and create a better, more comfortable world to live in.

BS INTERIOR ARCHITECTURE

WALKINGSTICK

SINGLE FAMILY RESIDENCE

GOAL AND OBJECTIVE

The DuPont Family is a family of four looking to retreat to a mountain home. This is a home that will serve the family for generations to come featuring ADA accessibility, four bedrooms, four and a half bathrooms, two large entertainment areas, optimal outdoor space, two car garage, and residential elevator.

AESTHETIC

The family admires the historic Adirondack style and traditional mountain home exteriors. While the interior reflects this style, is also remains sleek, modern, and follows the local design guidelines of the Walkingstick Community. Natural woods and greens throughout the home reflect the natural mountain landscape, but black, white, and gold accents keep the design clean and refreshing.

SALEM

SPA AND WELLNESS CENTER

GOAL AND OBJECTIVE

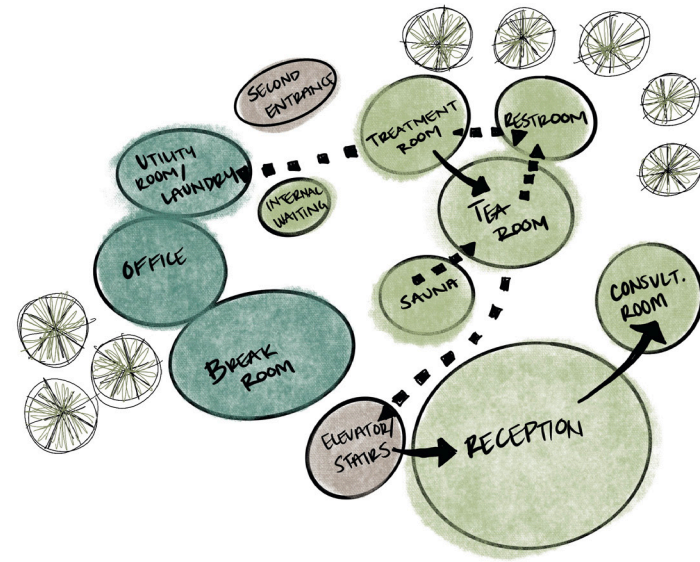

The Salem Spa and Wellness Center is a Holistic-Based business that focuses on assisting the body in reaching optimal relaxation and refreshment. The main amenities in the Spa include massage and treatment rooms, a sauna, and retail options to take the experience home.

AESTHETIC

The inspiration behind the design for the Salem Spa and Wellness Center is the naturality and refreshment of a forest. The dark greens, black, and gray are complemented by natural wood grain and white to create a biophilic, natural design.

LOFTS ON THE PARK CONDOMINIUM

GOAL AND OBJECTIVE

The clients are a young professional couple in need of a re-model that pays homage to the historic architecture of Lakeland, Florida with a modern flair that fits in with today's trends. The home suits the needs of the couple, space to relax as well as entertain, and also the needs of their visiting parents who may need ADA accessibility in the near future.

AESTHETIC

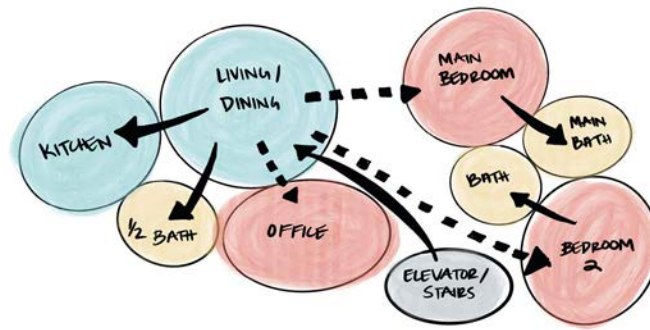

The design of the Lofts on the Park condominium is heavily inspired by the Spanish-Mediterranean Revival style that is historically common in the area. It also takes a clean, modern approach to reflect the couple's young and social life. Soft colored woods, blues, oranges, and white dominate this design.

KITCHEN RENOVATION

GOAL AND OBJECTIVE

The clients are a family of three consisting of a young married couple and their four year old daughter. They enjoy cooking as a family, growing their own herbs, and feeling connected to the outdoors. The kitchen features a six burner stove, double oven, and an island that transitions into the outside through folding windows. There is also a hydroponic herb garden worked into the kitchen cabinets right between the refrigerator and stove. To achieve the spacious kitchen the family desired, the kitchen was extended past its previous limits. Clerestory windows were also added to enhance the amount of daylight in the room but not take away from cabinet space.

AESTHETIC

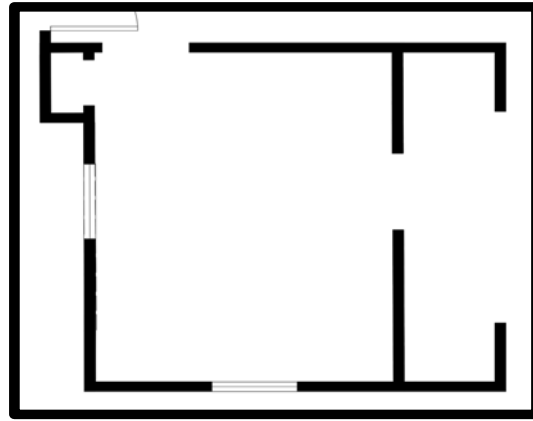

Inspiration from the family's Indian heritage played a huge role in the design of this kitchen renovation. The color palette is based around traditional Indian styles, including rich oranges and deep blue, with a highly contrasting stark white. The family also wanted to incorporate the bohemian style into this space, and that is seen with the floral tile, reclaimed wood, and abundance of sunlight.
